Comments: The UAA was conducted in July and no WBCR was observed. The stream met the maximum depth requirement in 0 of 3 sites and the average depth requirement in 1 of 3 sites. The downstream site #3 was not close to the end of the segment. Because this site was not close to the end, the committee did not have sufficient information to make a recommendation. For additional information, refer to UAA # 0194 that was also conducted on this stream and resulted in a committee recommendation to retain the WBCR designation.

**Committee Recommendation:** ☐ Retain Use ☐ Modify Use ☐ Remove Use ☒ Inconclusive
